Create a Child

Using the Yardsticks book, you are going to create a child in the age category of your choice. You must identify the **dominant learning style** and **multiple intelligences** of your child and determine if your child has any **disabilities** or **barriers to learning** **(you must include a minimum of 1 disability and 1 barrier)**. You will also address **physical**, **social-emotional**, **language**, and **cognitive growth** patterns. Finally, you may reference the **reading, writing** and **math** abilities of this age group. Draw your child as you wish and illustrate these descriptors on your picture.

On the back of your illustration, you must address each of the descriptors you created for your child. Describe them and discuss, as their teacher, how you would address each of them in the classroom.
