

JTED Program and Course Comparison Tables

ADE CTE revised the way in which CTE Programs are listed on the CTE Program List which identifies occupational programs that meet the labor market criteria of high skill, high wage, high demand occupations in Arizona. The revised methodology used in compiling the *2014 CTE Program List*, identified each previous “option” as a CTE program. Consequently, the number of programs identified of the CTE Program List grew from 38 programs on the *2013 CTE Program List* to 72 programs identified on the *2014 CTE Program List*. JTED program counts were affected in the appearance of a large increase in CTE programs offered from SY 2012-2013 to SY 2013-2014, even though the overall number of courses offered decreased by 148 courses for SY 2013-2014.
