STAR Workshop Content

The instructional methods of discrete trial training, pivotal response training, teaching functional routines, and positive behavior interventions and supports form the instructional base of this comprehensive program.

- ☆ Learn the STAR Program's (Arick, Loos, Falco, Krug, 2004) curriculum content
- ☆ Watch video and demonstrations of the three instructional methods in the STAR Program

What You Will Learn

- ☆ Developmental curriculum content appropriate for students with autism and other developmental disabilities that aligns with the Common Core State Standards and Essential Elements.
- ☆ Curriculum-based assessment techniques for baseline and progress monitoring.
- ☆ To use Applied Behavior Analysis (ABA) lesson plans.
- ☆ To teach students with autism to be independent and to generalize skills within their daily routines.

What You Will Receive

- ☆ Extensive handouts
- ☆ One STAR Program student assessment at each level
- ☆ Continental breakfast and light snacks
- ☆ A certificate for 12 hours continuing education credit

LINKS Workshop Content

The Links Curriculum capitalizes on students' strengths, interests and abilities. It emphasizes the concept of self-determination and positive transitions from school to post-school settings. The curriculum connects assessment and instruction to provide instructors the tools to assess, teach and monitor student progress within daily functional routines. The workshop will focus on assessment of student skills during naturally occurring routines, selection of appropriate learning goals and instruction utilizing evidenced-based strategies including discrete trial training. Participants will be trained to use a web-based application for assessment and on-going progress monitoring.

What You Will Learn

- A comprehensive curriculum for teaching the skills and concepts needed for students to be successful in school and community routines that aligns with the Common Core Essential Elements.
- To teach skills in both individual and group settings using evidenced-based strategies.
- To teach students skills during daily functional routines.
- To use interactive web-based tools to conduct assessments and monitor student progress on overall independence in school and community routines.

What You Will Receive

- Extensive handouts
- Links Curriculum Manual
- Continental breakfast and light snacks
- A certificate for 6 hours continuing education credit
- 10% discount on all Links subscriptions
