

## Instructions: Combined Indirect Cost Rate

Arizona Revised Statute (Title 15-Chapter 3 Article 1) states that County School Superintendents (CSS) will handle the fiscal activities of districts including federal grant funds unless the district has been approved for fiscal independence. (R7-2-902).

The Combined Indirect Cost Rate will affect the grant application and project summary.

## Grant Application

Federal grant applications that allow indirect costs will now reflect the entity's approved indirect cost rate (ICR) plus the county's approved rate, if applicable, in the financial data line item page. If the combined indirect cost rate is more than the grant's maximum allowable indirect rate, then the maximum allowable rate will be used in the application.

## Project Summary

Project Summary will include county's ICR for the current fiscal year along with Entity's ICR. Regardless of type of entities and type of grants, this information will be displayed in their Project Summary as additional information. Actual Com-

bined Indirect Cost Calculation will be only used for districts (Not applicable to pilot schools, which are school districts that have been approved for fiscal independence.)

The following calculation will be used for a district's restricted indirect cost rate if applicable.

A. County's Indirect Cost Rate + Entity's Indirect Cost Rate = Combined Indirect Cost Rate

*Example: County's ICR (1.56%) + EICR (1.52%) = (CICR) 3.08%*

B. Compare Combined Indirect Cost Rate against grant's maximum allowable indirect cost rate

*Example: 3.08% < Maximum allowable Indirect Cost Rate (8%)*

C. The Grants Management System will use Combined Indirect Cost Rate as the Indirect Cost Rate if it does not exceed the maximum allowable by program legislation/regulations.
