

Arizona's educators need integrated tools to increase student achievement

A comprehensive system will allow teachers to diagnose specific troubles a student is having with a learning concept, then with a few clicks, find proven teaching techniques to provide instant intervention.

- ★ Link staff development programs and evaluation activities with student learning
- ★ Correlate state/district curriculum standards to instructional programs and assessment strategies
- ★ Identify gaps in instructional programs and empower staff to enhance productivity and improve accountability

The ***AELAS Assessment Engine*** lets educators drive the creation, sharing and administration of assessments measuring student growth and achievement.

The ***AELAS Content Management System*** serves as the state's digital education library. The ***AELAS Learning Management System*** organizes, delivers and tracks classes and courses.

The ***AELAS Teacher and Principal Evaluation System*** helps administrators evaluate performance and appropriately tailor professional development.
