

A commitment to LEAs:

- ★ **Integrate** existing applications to eliminate duplicative programs
- ★ **Consolidate** the 285 data requests to 30 per year
- ★ **Reduce** ADE's data elements by at least 80%

Data governance reduces the unnecessary burden placed upon LEAs

Arizona's vision of data use is simple: accurate, actionable information for parents, educators and policy makers to make informed education decisions.

ADE will no longer barrage schools for data we already have. When a student walks in the door, a school administrator will enter the information and demographics **one** time. ADE has published a schedule of what data needs to be reported and when and why it will be collected. ADE staff can run reports and analyze data without contacting LEAs because we already have it in a safe, secure and accurate format.

Visit www.azed.gov/data to learn about ADE's effort to reduce data burdens
