

### **Dropout Rate by District and School for Schools/Districts Included in State Calculations**

School districts are identified based on the grade range in which they provide instruction. *Unified* districts typically offer instruction in all grades, kindergarten through grade 12. *Elementary* districts offer instruction from kindergarten through grade 8. *Union high school* districts offer instruction in grades 9 through 12. *Accommodation* districts and *special programs* serve students with academic needs that cannot be accommodated within an existing type of district. Because of the various district types, aggregated school district data cannot be used for comparison purposes. For example, unified districts should not be compared to elementary school districts or union high school districts. However, data contained in Table 9 and Table 10 have been disaggregated (i.e. data from elementary and secondary schools have been separated) so that accurate comparisons of disparate districts may be made within each table. Charter schools are designated with a “C” character.

Table 9 contains the alphabetical listing of districts and schools that provide instruction in grades 9-12, dropout and status unknown rates for districts and schools and were included in the state analyses.

Please note the sum of school enrollment may be greater than the district enrollment because the school level dropout rate formula takes into consideration student migration between schools in the same district. Also, in accordance with the Family Educational Rights and Privacy Act of 1974, data pertaining to fewer than ten students have been replaced with an asterisk (\*) to protect student privacy.
