# **1 Overview**

## **1.1 Mission**

1.1.1 To modify Integrity to preclude an enrollment for a voucher student from being submitted by a Public Special Education Institution (Type 12) with a Tuition Payer Code = 1, which identifies the enrollment as fundable.

1.1.1.1 Public Special Education Institution voucher students do not generate state aid funding and are instead funded separately, through the voucher system.

1.1.1.2 If a Public Special Education Institution voucher student's enrollment shows a Tuition Payer Code = 1 and the student has a concurrent enrollment in another LEA (e.g., in a JTED), the other LEA's ADM will be limited incorrectly. Restricting these enrollments from generating ADM will result in correctly limited ADM in this situation.

# **2 Governing Statutes, Rules and Resources**

## **2.1 A.R.S. 15-1202**

2.1.1 This statute refers to Special Education institutional vouchers.

# **3 Business Rules for Integrity Modifications**

## **3.1 Integrity modification for voucher students**

3.1.1 Modify ADM Integrity to not allow a Public Special Education Institution ( Type 12) to submit an enrollment transaction for a voucher student with a Tuition Payer Code = 1.

3.1.2 If a Public Special Education Institution submits an enrollment transaction for a voucher student with a Tuition Payer Code = 1, fail ADM Integrity.

3.1.3 If the record fails ADM Integrity, return a message that reads: "Public Special Education Institution voucher students do not generate fundable ADM and cannot be reported with a Tuition Payer Code = 1."

# **4 Known Affected Applications/System Areas**

## **4.1 Integrity**

## 5 Glossary

**Term**

**Is Defined As:**

LEA

Local Education Agency

JTED

Joint Technological Education District

ADM

Average Daily Membership
