

Teacher Rating Tables and Excel Workbooks

The Rating Tables and Excel Workbooks below are designed to be used together. The Rating Tables are a guide which should be used in your Evaluation Pre-Conference when explaining the criteria used in your teachers' evaluation for the student academic performance component. The administrator will select the matching Excel Template to use for each teacher. The Excel Workbook is utilized to calculate the data included in the three components of the evaluation model into a final summative performance rating for a teacher.

NOTE: Please use the rating tables under the "Combo" folder if your Group B Teachers will be held accountable for state reading and math assessment scores.

These are Version 11.0 and were updated as of April 15, 2015.
