

Follow-Up and Supervision Checklists

All staff should support STEM in the program. Some staff may contribute by using STEM vocabulary and providing everyday STEM activities. Others may be comfortable leading projects; others may have knowledge and expertise they are eager to share.

Discuss with staff what you will be looking for, what they are looking forward to and challenged by, and how and when you and staff can review and discuss.

Integrating STEM Checklist and Review

Spark Interest, Expand Horizons

Do Staff

- Maximize time in the program to bring in STEM vocabulary, materials, or opportunities
- Create activity centers to facilitate independent exploration
- Listen for and tap into youth interests
- Create opportunities for STEM-centered field trips
- Deliberately use math and science vocabulary (*See: STEM P's and Q's Tool and Training Starter*)
- Provide materials that support math and science concepts and exploration
- Encourage children and youth to make presentations
- Form student committees for STEM activities and projects

Connect with School Content

- Staff can explain where STEM content is incorporated
- Staff know names and contact information for school teachers, especially science, math, and technology teachers
- Staff communicate with teachers
- Staff are aware of STEM standards and goals for students
- Students use STEM vocabulary
- Students can explain connections with school learning
- Students and staff can explain STEM learning objectives

Dedicate Time

- Staff blend STEM into the program in different ways
- Program time is dedicated to STEM activities
- Materials are made available
- Staff support student learning during homework time
- Staff allocate the appropriate amount of time for the STEM activity or project
- Staff ensure student attendance and participation in STEM programs

Follow-Up and Supervision Checklists

Tap Resources

- Staff are aware of local resources and expertise
- Staff incorporate parent and family skills and knowledge
- Students are aware of local businesses, institutions, organizations, and universities involved with STEM
- Staff invite experts to present
- Staff utilize STEM activity and project plans from the web or expert sources
- Staff utilize STEM curriculum effectively
- Staff draw upon STEM-skilled volunteers and university partners
- Staff and students plan and sustain STEM career exploration activities
- Students utilize computers for STEM investigations and information
