

Professional Development

Professional development is an integral part of teacher understanding of reading, including core programs, tier 2 and tier 3, assessment, and data analysis. Without specific training and support, any fidelity, reliability, validity and a change in practice may not occur. This important component is vital to the Literacy Plan, as it details how the school/ district will support continued growth and learning for teachers.

Each box below should briefly describe the plans you have for professional development in each of the areas and who may be providing that training. Sample information is included in the boxes below.

Professional Development Plan

For successful implementation of core reading programs, intervention, purposeful assessment, and appropriate data analysis, teachers need ongoing support through carefully planned professional development. ARS 15-704 requires all school districts and charter schools to provide ongoing teacher training based on evidence-based reading research. Please provide a brief narrative outlining the professional development plan (including any internal and/or external providers) for each area of focus for the current school year.
