Principle 5 - Conditions, Climate, and Culture

Definition: Inclusive schools are conducive to student learning, fulfillment and well-being, as well as professional satisfaction, morale and effectiveness. Students, parents, teachers, administrators and other stakeholders contribute to their school's culture, as do other influences such as the local community, the policies that govern how it operates and the school's founding principles. School conditions, climate and culture are impacted by the beliefs, perceptions, relationships, attitudes and written and unwritten rules that shape and influence every aspect of how a school functions. They also encompass concrete issues such as student physical and emotional safety, a healthy school environment, the orderliness of classrooms and public spaces and the degree to which a school embraces and celebrates racial, ethnic, linguistic, academic and cultural diversity and ensures equity.

*Based on trends and patterns, identify possible primary needs for Principle 5 - Conditions, Climate & Culture:

There is an overall need for our staff to take intentional and proactive actions that build mutual respect with families and students (Indicator 5.2). In regards to our families, this includes proactive, positive, timely communication in their primary language. In regards to our students, this includes taking the time to build positive, trusting relationships and using those relationships as the foundation for their classroom behavior management, as mutual respect is a critical part of our PBIS framework. Having strong PBIS in our classrooms will mean that less instructional time is lost to addressing behavior and will directly support out efforts in Principle 2.
