The Seal of Biliteracy is Entering its Fourth Year!

The Seal of Biliteracy recognizes students who are proficient in English and at least one other language. If you are a school district or charter school interested in the seal visit the [Seal of Biliteracy webpage](#) for more information including requirements, eligibility, and approved assessments.

SOCIAL
STUDIES

New Resources and Videos for the History and Social Science Standards

The Social Studies Department has been busy creating new resources including several videos that will support teachers in implementing the new standards. This year is a transition year with full implementation in 2020-2021. The videos include a K-2 Standards Overview, 3-5 implementation suggestions, how to implement Social Studies and ELA, and World History Inquiry to name a few. There are also resource pages for each grade level and an ELA/Social Studies Crosswalk. You can find all these resources and more (we are adding daily) at the social studies standards [webpage](#).

Analyzing Middle School & High School Math Exams Tools and a Process for Sites and Districts

This learning event will focus on the analysis of final exams or EOC exams through the use of tools and processes. The criteria for analysis are based on CCSSO's Criteria for Procuring and Evaluating High-Quality Assessments, and include alignment to standards (including practices), balance of rigor (conceptual understanding, procedural fluency and skills, and application), cognitive complexity, and quality.
