Supporting standards. Supporting success.

World Languages Interactive Symposium

Join us for an interactive day of discussion and learning on a variety of topics facing world and native language teachers. Our free symposium will feature round-table discussion topics on performance and proficiency, using technology in the classroom, formative assessments, dual language immersion, the Seal of Biliteracy, the latest available resources, and much more.

or the Arizona Association of Teachers of Mathematics or AATM is FREE?

Yes it is!!! AATM Membership is available at no charge to all persons interested in supporting mathematics education in Arizona. Become an Active Member of AATM by [registering here](#).

Arizona Department of Education's first-ever Equity, Diversity and Inclusion program.

The Equity, Diversity, and Inclusion (EDI) program area is responsible for driving the Arizona Department of Education's (ADE) internal and external efforts to better serve under-represented, marginalized students and their families. This effort involves ensuring access to supportive learning environments across Arizona, identifying cross-agency collaboration opportunities and creating a strategic plan for equity initiatives. EDI will work with ADE's Policy and Government Relations team to suggest legislative actions necessary to facilitate equity for all Arizona students and take part in various task force groups that focus on equity issues, (i.e., Latinx Advisory Council, the African American Advisory Council, and the Equitable and Inclusive Practices Advisory Council).
