

U.S. Presidential Scholars in Career and Technical Education 2021-2022

Criteria for Candidate Identification and Nomination

The designated organization(s) will use the following *general principles* and *specific standards* to develop a pool of U.S. Presidential Scholars in Career and Technical Education (CTE) nominees.

General Guiding Principles:

- **Academic Rigor** – students will demonstrate high proficiency on their State’s academic standards, based in part on their high achievement reflected on their State’s academic assessments in the core academic subjects.
- **Technical Competence** – students will demonstrate mastery of technical skills demanded by industry.
- **Employability Skills** – students will demonstrate such professional skills as teamwork, decision-making, and problem-solving.
- **Ingenuity and creativity** – students will have solved a real-world problem through the application of technical skills they developed in their career area.
- **Application pool** – students will represent the multiple sectors that are viewed as the pillars of our nation’s economic growth: Healthcare, IT, Advanced Manufacturing, STEM, and Transportation, as well as the socioeconomic characteristics of our nation’s high school graduates.
- **Eligibility** - For the **CTE component** of the program, students must meet the following criteria:
 - are or will be U.S. citizens or Legal Permanent U.S. Residents by the application deadline;
 - graduate or receive a diploma between January and August of 2022, the current program year;
 - demonstrate academic achievement in career and technical programs; and
 - are nominated by their state's Chief State School Officer (Arizona Superintendent of Public Instruction).

Specific Standards:

- **Academic rigor** as calibrated to standard set by the National Technical Honor Society (NTHS) and based in part on their high achievement reflected on their State’s academic assessments in the core academic subjects:
 - An overall grade point average of 3.0 or higher on a 4.0 scale (unweighted)
 - Grade point average in their selected career pathway of 3.25 with no grade below B-.
- **Technical competence** as demonstrated by *one or more of* the following:
 - Completion of a work-based or community-based learning experience (Note: The term ‘work-based learning’ means a program of structured work experiences (such as internships, on-the-job training, apprenticeships, school-based enterprises, and Supervised Entrepreneurial Experiences) that is coordinated with classroom-based learning and that is designed to enable students to learn and apply career and technical education skills and knowledge in a work context.
 - Placing a medal in State and/or national Career and Technical Student Organization (CTSO) skills competition in his/her career area.
 - Earning an industry-recognized certification/credential. (The term ‘certification’ means a certificate from industry and awarded by a certification body based on an individual’s demonstration, through an examination process, that he or she has acquired the designated knowledge, skills, and abilities to perform a specific job.)

- **Employability skills** as demonstrated by *one or more* of the following:
 - Completion of a work-based learning experience that is an integral part of the curriculum of the program of study.
 - Leadership role in a Career and Technical Student Organization (CTSO) at local, state, or national level.
 - Completion of a community service project or other student leadership activity in his/her career area of interest.
 - Scores at the Gold Level in each of the three core areas of the National Career Readiness Certificate (i.e., Applied Mathematics, Locating Information, and Reading for Information), which means that the student has the foundations skills for approximately 90% of jobs of jobs examined.

- **Ingenuity/Creativity/Problem Solving** as demonstrated by *one or more* of the following:
 - Solution to a real-world problem (e.g., developed electric car that goes faster than any before).
 - Development of a new product/good or service (e.g., development of an app).

Process:

- Application for the U.S. Presidential Scholars Program is by invitation only. Students may not apply individually directly to the federal program.
- Each student must completely fill out their own application and write their own essay. Students should work with their instructors for guidance.
- The application and essay must then be submitted to the CTE Director in their district who will review the application and essay for completeness and quality. The CTE Director may then return the documents for further work before and submitting them for nomination to the ADE CTE judging process for further review.
- ADE CTE enlists a panel of judges to review each application and essay. The judging panel includes representatives from business and industry, and secondary and postsecondary schools.
- The judges score each submission using the rubric supplied by ADE CTE and submit their top ten candidates to ADE CTE.
- Judges scores are input into a formula and the top five candidates are submitted for review to the Arizona Superintendent of Public Instruction, the Chief State School Officer.
- The Chief State School Officer reviews the five candidate's information and submits up to five candidates to the federal U.S. Presidential Scholars in CTE program.
- Those candidates are then contacted by the federal U.S. Presidential Scholars in CTE program to complete an additional application. Once returned, this is reviewed at the federal level by the Commission on Presidential Scholars and those selected as the final candidates are notified by the federal U.S. Presidential Scholars in CTE program.
- Students chosen as U.S. Presidential Scholars receive a Presidential medallion, in commemoration of their achievements during National Recognition Program. All Scholars will be publicly celebrated for their achievements and presented with a Medallion during National Recognition Program. Details about the program will be shared at a later time.
