About the Sample Test Scoring Guide

The Arizona's Academic Standards Assessment (AASA) Sample Test Scoring Guides provide details about the items, student response types, correct responses, and related scoring considerations for AASA Sample Test items.

Within this guide, each item is presented with the following information:

- Item number
- Cluster
- Content Standard
- Depth of Knowledge (DOK)
- Static presentation of the item
- Static presentation of student response field (when appropriate)
- Answer key, rubric or exemplar
- Applicable score point(s) for each item

The items included in this guide are representative of the kinds of items that students can expect to experience when taking the computer-based test for AASA Grade 4 Math.

Rectangles A , B , C , and their side lengths, in inches (in), are shown.

Complete the sentences about the perimeter and area of the rectangles by selecting the correct answers from the drop-down menus.

Rectangle B ▼ has a perimeter of 32 inches.

The area of Rectangle A is 24 ▼ square inches.

(1 Point) Student selected both correct answers from the dropdowns.
