

Free Professional Learning for EC SLPs A Sweet Taste of Language Sampling: The SUGAR Method for Early Childhood SLPs

A three-part professional learning opportunity for speech-language pathologists working in the preschool and/or kindergarten settings.

Language Sample Analysis (LSA) is an important part of a comprehensive preschool speech and language assessment. It can also inform the selection of targets for intervention and be used to monitor progress. Yet, lack of time may be a barrier to its widespread use. You will leave this three-part training prepared to use SUGAR—an easy, valid, evidence-based, and totally cost-free language analysis method that can help make the routine use of LSA feasible for busy clinicians working in the preschool-kindergarten setting.

Part 1	Thursday, 10/28/21	12:00–3:15 p.m.
Part 2	Friday, 10/29/21	12:00–3:15 p.m.
Part 3	Friday, 12/03/21	12:00–3:15 p.m.
