

# Elementary School Exposures to Careers

## Career Discovery Corner Kinsey Elementary School Library – Flagstaff, AZ

In December, we introduced a new section of the library outfitted with age-appropriate career resources. We wanted our students to have a space to expand their understanding about the workforce and to discover new possibilities.

### Current Favorite in the Kinsey Career Discovery Corner?

***The Firefighter books!***  
***Our students really like learning about what Firefighters do during a fire and what equipment they use to put out fires.***

Students are scheduled to visit the Career discovery corner twice a month to dream about the future by reading books and exploring online career media. This has helped strengthen my relationship with my students. They ask earnest, delving questions and I can see their motivation and hope for their future.

*I really wished this at my school library when I was growing up!*
