- Advanced Endpoint Protection (AEP)
- Multi-Factor Authentication (MFA)
- Web Application Firewall (WAF)

Student Data Privacy Proof of Concept

How are school districts validating and approving online applications?

Do local education agencies have a process in place to validate and approve online resources before they are used?

- No, we do not have a process in place or plans to initiate one
- We have initiated / drafted a process and are yet to finish its implementation
- Yes, we have a fully implemented process for the approval of online resources

PROOF OF CONCEPT

20 affiliate memberships granted to 1EdTech Consortium, with:

- Access to a **global community** to learn about **new innovations**, standards and specifications
- Access to **TrustED Apps dashboard** using industry-standard rubric for vetting and certifying applications
- Access to **Compatibility Check** to validate app interoperability
- **Training** in data standards to protect student data privacy
- **Community support** in defining processes for online resource district approval

ELIGIBILITY

- LMS certified with **LTI v.1.3 (Canvas, Schoology, Moodle, D2L)**
- Must allocate a small percentage of at least two resources:
 - **a technology resource**
 - **an instructional resource**
- Process for the **collection** of online educational resources
- Preference will be given to the first qualifying LEAs that, collectively, meet the criteria for diversity in group representation.
