chit chat

What does November mean
in your world? What are you
grateful for?

TOWNHALL OBJECTIVES

- Introductions, review of purpose and goals
- Group will learn about:
 - ODTL Updates
 - Cyber Incident Response, ACTIC
 - Cybersecurity Awareness Training, Chandler USD & Fortinet
 - Administration Reports, Sahuarita USD
 - Ed Tech Integration, ADE
- Gather feedback and input from participants

Arizona Department of Education Five Year Strategic Plan

Priority #1: Student Equity and Achievement

Priority #2: Educator Recruitment and Retention

Priority #3: Safe and Healthy Schools

Priority #4: Strategic Funding

Priority #5: Strategic Data Use

Office of Digital
Teaching & Learning

ODTL Strategic Plan

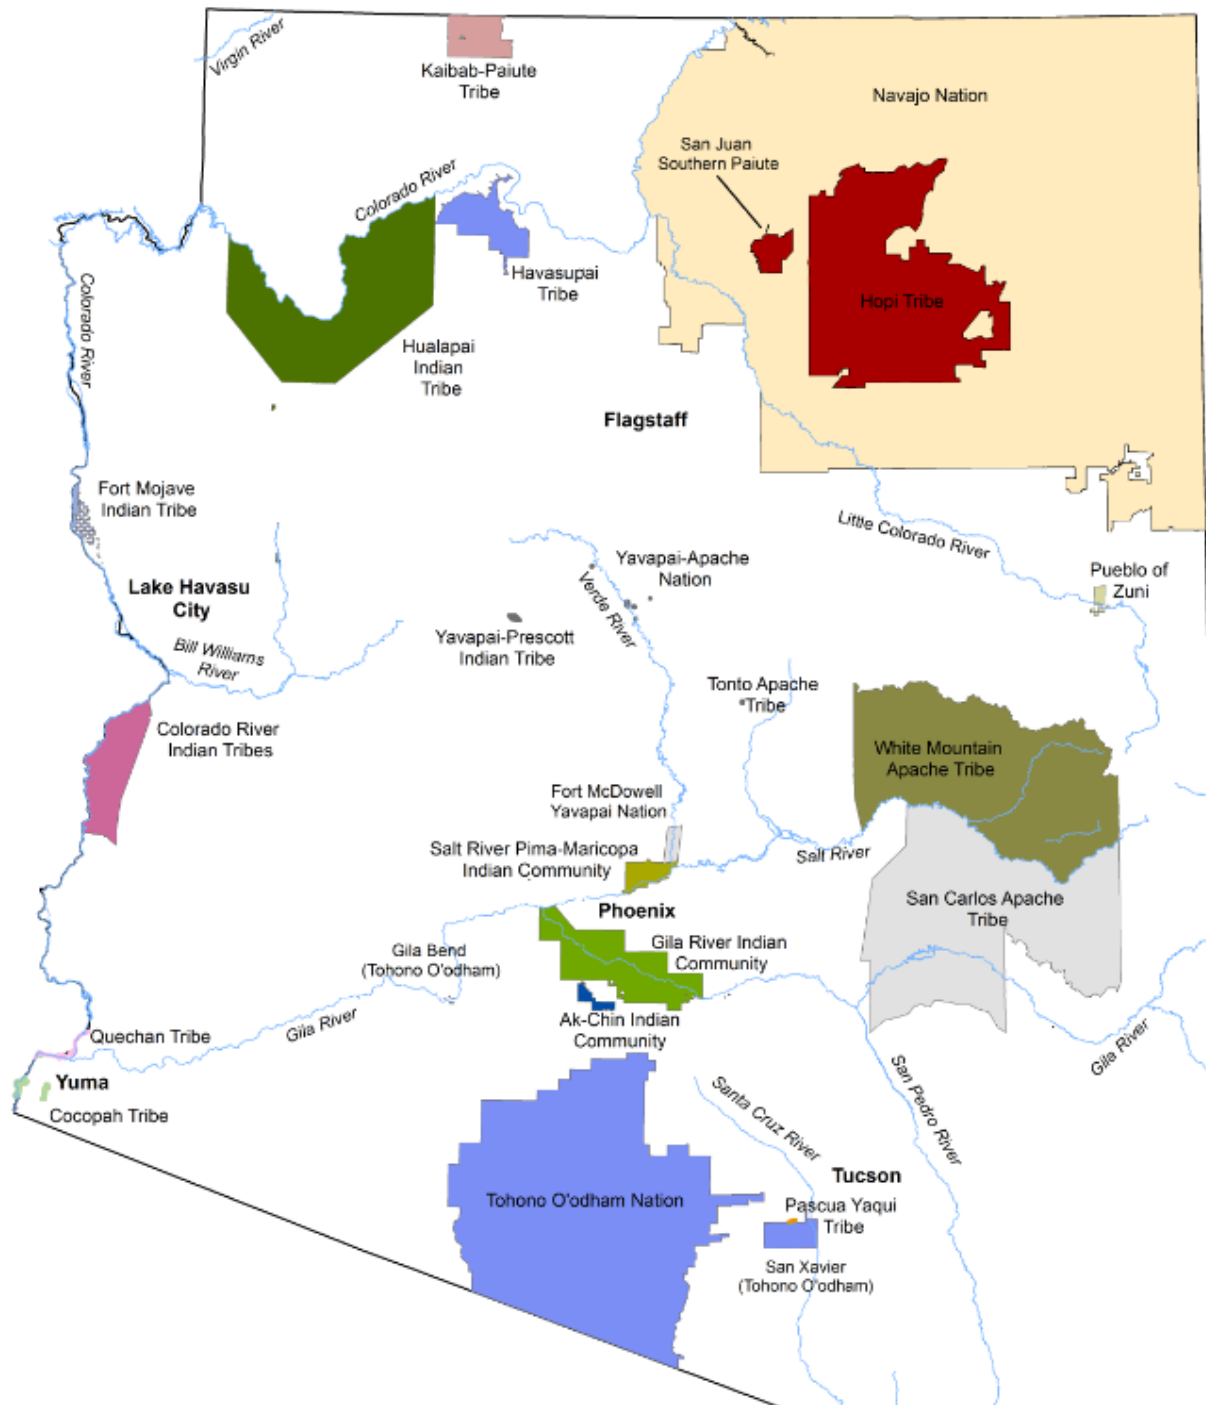

1. Build Community with Local Education Agencies and solution experts
2. Gather Data / Measure Progress
3. Facilitate Technology Solutions and Resources

Native American Heritage Month

- 22 Federally Recognized tribes in Arizona
- Office of Indian Education newsletter and updates include teaching tips, resources

Newsletter: <https://www.azed.gov/sites/default/files/2022/11/NAHM%20-%20Newsletter%20%28week%20%29.pdf>

ODTL Updates

Office of Digital
Teaching & Learning

Solutions to meet your digital needs

1. Cooperative Purchasing Program
2. Cybersecurity Resources

COOPERATIVE PURCHASING PROGRAM

A suite of solutions that support the overall management of K12 digital devices (laptops, desktops, tablets).

- Windows & Chromebook devices
- Leverage economies of scale with state-wide contracts
- Services include white glove, cybersecurity protection, staging, damage protection and disposal
- Considers the Total Cost of Ownership (purchasing device and operating it)

COOPERATIVE PURCHASING PROGRAM SURVEY RESULTS

MORE!

122 Districts and Charter Systems from 14 counties in Arizona expressed interest in the program

On average, responding LEAs plan to purchase, per year:

- 69,000 Chromebook devices
- 30,000 Windows laptops
- 4,800 Windows desktops

COOPERATIVE PURCHASING PROGRAM COMMITTEE

Email to get involved:

odtl@azed.gov

Office of Digital
Teaching & Learning

Cybersecurity Resources

- Cyber Readiness Program – Az Dept of Homeland Security
- [Cyber Readiness Program Feedback Survey](#)
- Fortinet Cybersecurity Awareness Training for K-12s

Community Action

- [Technology Townhalls](#)
- [Tribal Technology Roundtables](#)
- [Digital Office Hours](#)
- [LinkedIn](#)

- Digital Office Hours
 - Thursdays each week
 - 11am-1pm MST
 - Special guests, topics weekly

We need your help!

- Could these benefit your school or classroom? How?
- What are the biggest challenges and successes at your school?
- How can ADE help?

Free Security Awareness and Training Service for Education Sector (K-12)

Mark Kelly

kmark@fortinet.com

Major Account Manager

The White House National Cyber Workforce and Education Summit

July 2022

“The event focused on building our Nation’s cyber workforce, improving skills-based pathways to cyber jobs, educating Americans so that they have the skills they need to thrive in our increasingly digital society, and improving Diversity, Equity, Inclusion, and Accessibility (DEIA) in the cyber field. Bringing together entities who employ, train, and educate cyber professionals and Americans at large, the event involved senior U.S. Government officials, senior executives from the private sector, and thought leaders from across the cyber community and the education sector.”

White House Fact Sheet: <https://www.whitehouse.gov/briefing-room/statements-releases/2022/07/21/fact-sheet-national-cyber-workforce-and-education-summit/>

THE WHITE HOUSE National Cyber Workforce and Education Summit

July 2022

Fortinet's announcement at the White House National Cyber Workforce and Education Summit

Fortinet is making the new Fortinet Security Awareness and Training service available for free to K-12 schools across the U.S.

“The expansion of its free training offerings provides the potential to help **more than 8 million staff and faculty members in U.S. schools** become more cyber aware and improve their skillsets to avoid breaches at educational institutions.”

Fortinet Press Release: <https://investor.fortinet.com/news-releases/news-release-details/fortinet-announces-free-training-offering-schools-white-house>

July 19, 2022 at 9:00 AM EDT

Fortinet Announces Free Training Offering for Schools at White House National Cyber Workforce and Education Summit

Free Training Service for more than 8 Million Staff and Faculty Across U.S. School Districts will Advance Fortinet's Mission to Close the Cyber Skills Gap

SUNNYVALE, Calif., July 19, 2022 (GLOBE NEWSWIRE) --

Sandra Wheatley, Senior Vice President, Customer Marketing, Threat Intelligence and Global Influencer Communications at Fortinet

“Fortinet is proud to participate in the White House National Cyber Workforce and Education Summit to share our expertise and insight based upon our longstanding dedication to closing the cyber skills gap through cross sector collaborations and dialogue. Since the establishment of the Fortinet Training Institute in 2016 and through our Training Advancement Agenda (TAA) initiatives, Fortinet continues to make cybersecurity opportunities accessible to more people, including populations who are often overlooked such as women, minorities and veterans, through training. Today, as part of our pledge to train 1 million people in cybersecurity across the next five years, Fortinet announced a new free training offering to help combat attacks on our educational institutions.”

The Need

Individual Awareness is Low

In the last 12 months, the “human element”
has been involved in

85%

of breaches, and in nearly half of them (36%)
phishing was the primary mode of attack.

Gartner®, Market Guide for Security Awareness Computer-
Based Training, Richard Addiscott, Claude Mandy, William
Candrick, 26 July 2021

*GARTNER is a registered trademark and service mark of Gartner, Inc. and/or
its affiliates in the U.S. and internationally and is used herein with permission.

Training tailored to the Education Sector

Lesson Objectives

- Describe the risks associated with social media
- Understand some of the common vulnerabilities associated with social media
- List actions that you can take to secure your social media accounts

Key Concepts

Offline Risks

Home Security

Your home security can be at risk due to the content that you share on social media.

If you post content related to when you're going on vacation, trip photos, or tag locations in your posts, a bad actor can determine when you're away from home and use that opportunity to compromise your home security.

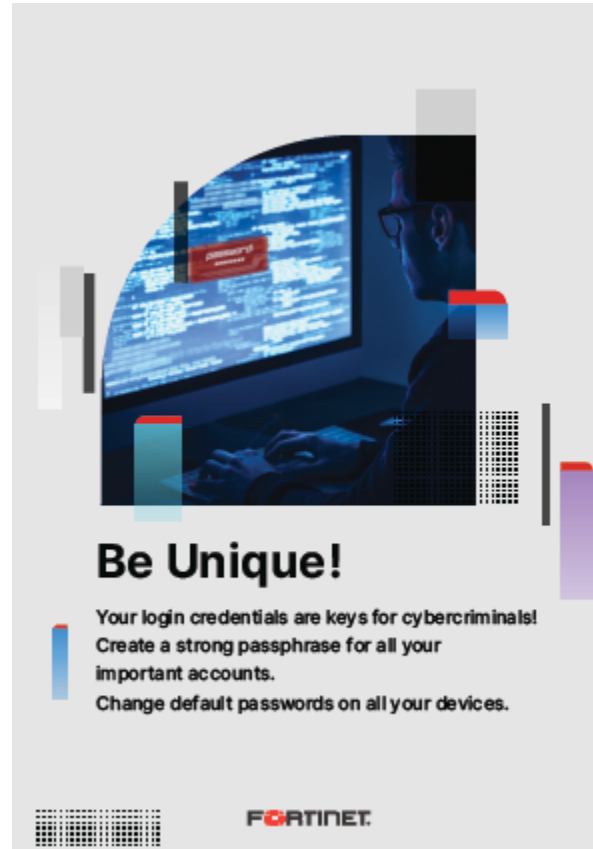

Education Focused Communication Resources

Reinforce key teachings from training modules

Banners – various sizes

Posters – 6 versions

Tip Sheets - 2 versions

Screen Savers – 6 versions

Key Benefits

Train faculty and staff to recognize and report on potential security threats in email, online or in a physical setting.

Reduce the costs and strain on security and IT in managing infections and removing malware.

Prevent the impact of breaches caused by faculty and staff errors and poor judgment.

Create a security-compliant culture.

Ensure faculty and staff are aware of data privacy and security and are motivated to protect personally identifiable information and other sensitive data types.

Colleen Flannery
Chief Technology Officer

Learner Portal and Administrative Console

Learner Portal

- Learners can view:
 - The modules they need to take
 - Their status as they progress through the modules
 - The modules that are over-due
 - The mandatory quizzes
 - A list of completed training modules on PC, Tablet or Mobile
- Admins can:
 - Customize the program using existing templates
 - Customize welcome or program introduction message
 - Schedule programs with start, end, and due

Training Modules & Videos

Multi-Modal Learning

Information Security

Data Security

Lesson Objectives

- Describe Data Security
- Describe the Data Lifecycle

Key Concepts

Tactics and Techniques

Click to learn more about how data is protected against unauthorized access and exploitation.

A circular diagram with a central text box and eight surrounding icons connected by a dotted line. The icons represent various data protection concepts: a server rack, a gear, a document with a checkmark, a shield with 'DLP', a key, a padlock, a person, and a brain.

- Training in multiple formats to appeal to different learning styles: video, text, images, audio, animation
- Training modules cover Security Awareness, Data Privacy, Internet Security, Password Protection and Physical Security
- Training addresses the information security needs for GDPR, PCI DSS, SOC 2, PIPEDA, CCPA, ISO/IEC 27001
- Interactive quizzes and knowledge checks
- Base modules, micro training and nano training - introduce, engage, re-engage and reinforce—train throughout the year

Engage Employees with Effective Training

Created by a team Fortinet security and training experts.

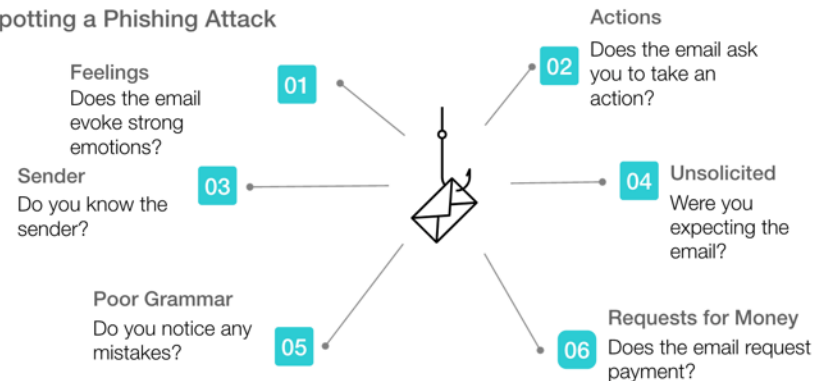

Lesson Objectives

- Describe Phishing
- Describe Risks
- Describe How to Spot and Avoid

Key Concepts

Spotting a Phishing Attack

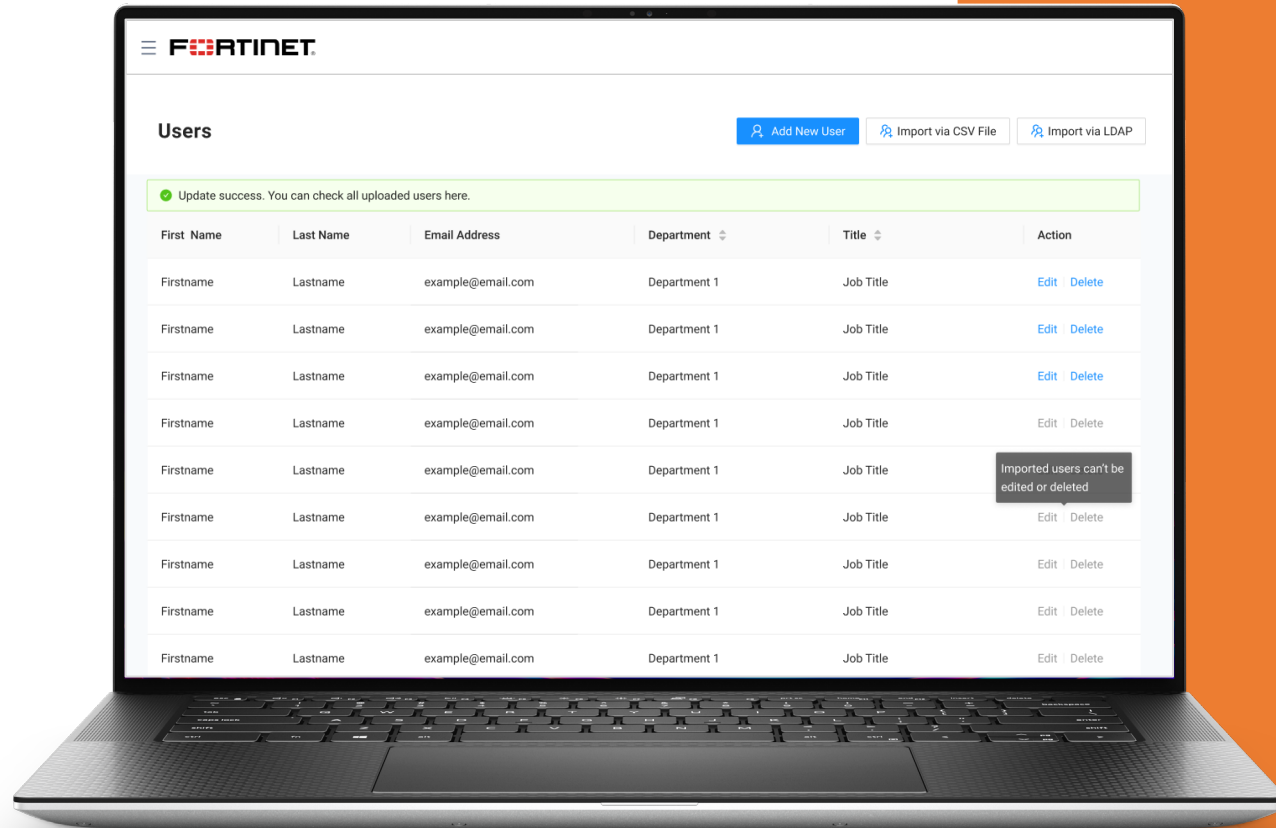

Created by the award-winning Fortinet Training Institute

- Over a million certifications issued
- Team of security experts, e-learning developers and trainers created the solution following proven adult learning methodology

Training modules are high quality, focused, market-driven and responsive

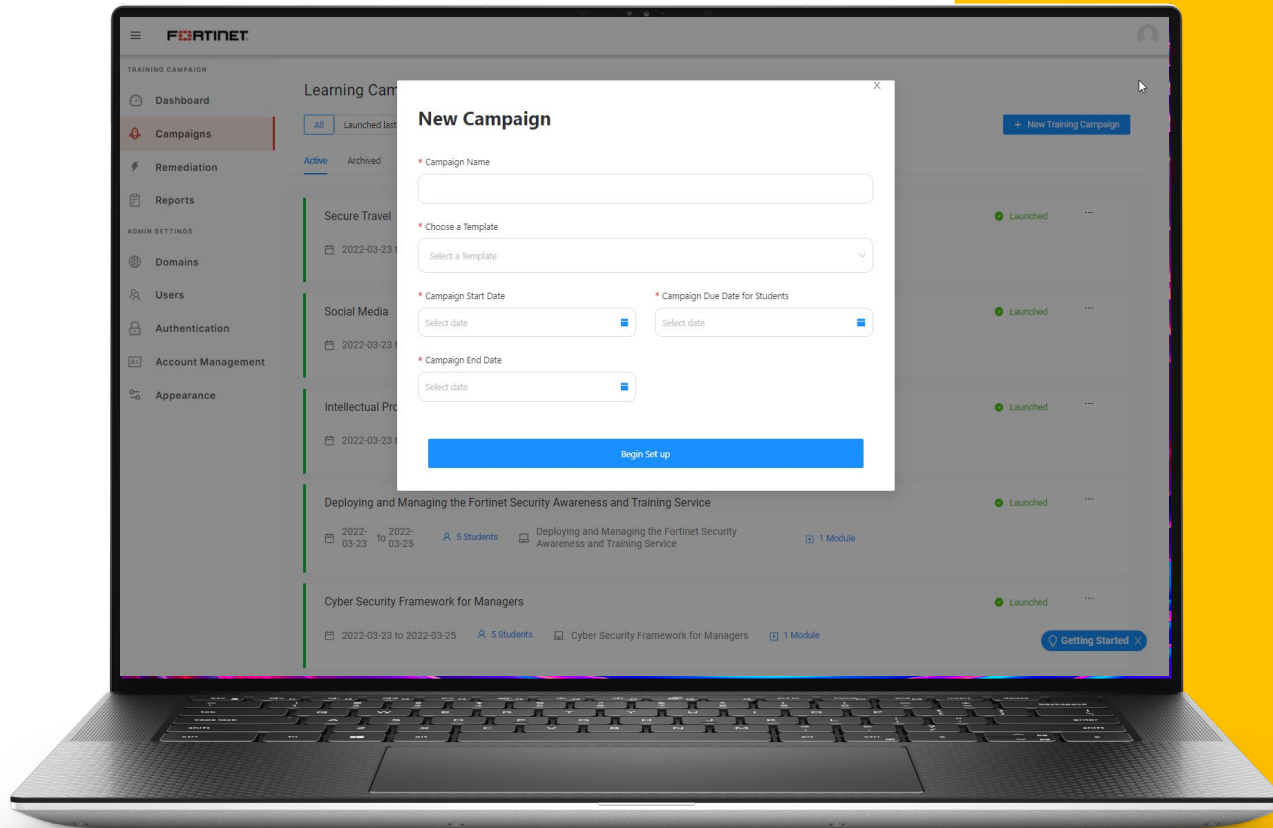

- Solution is purpose-built to address customer need while removing all the excess that makes other solutions expensive and cumbersome to deploy

Admin: User Provisioning & Management

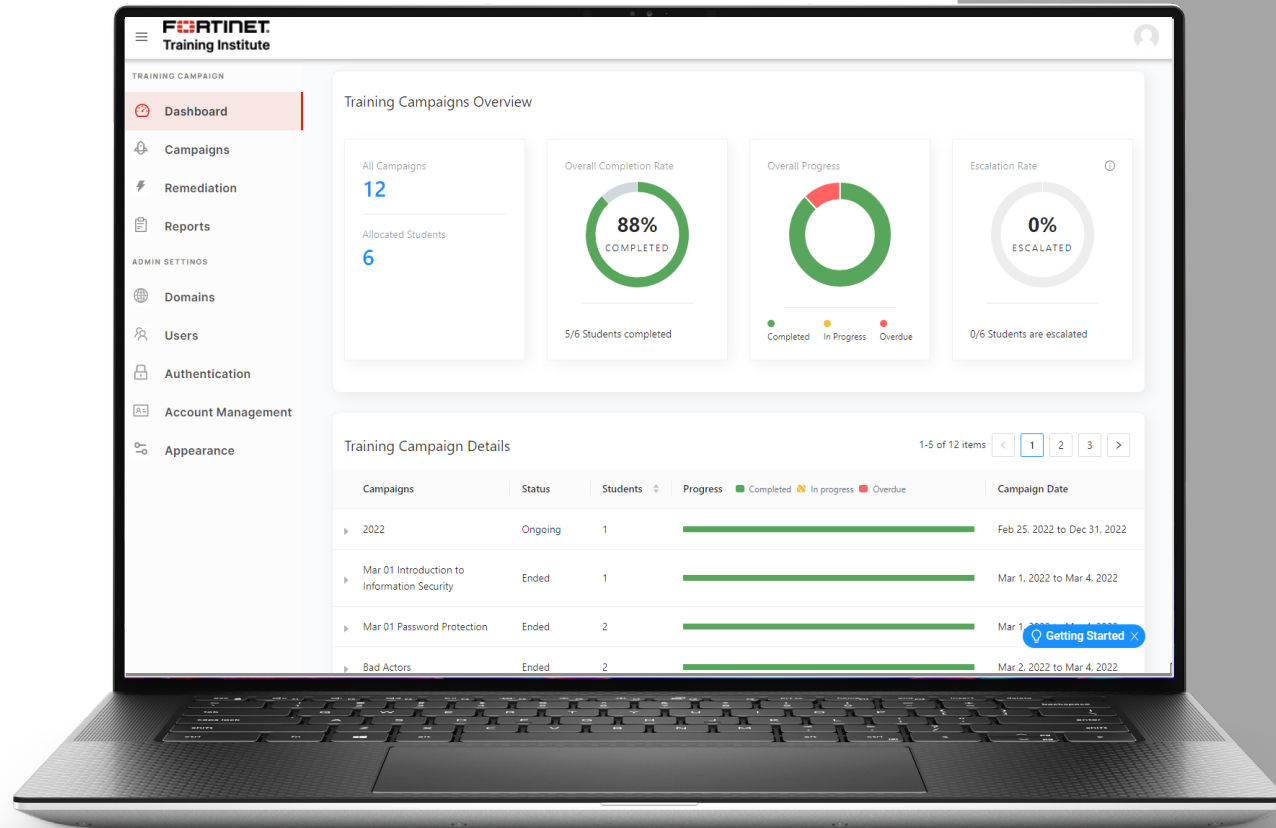

- Create, update or manage users manually, with an import file or LDAP integration
- Role-based hierarchical registration with manager roles
- Single-Sign-On
- Two-factor authentication (2FA)

Campaign Builder

- Build custom campaigns with selected training modules that will address the needs of the organization
- Getting started, reminder, and course completion emails for learners
- Set-up automation triggers for getting started, re-engagement and remediation training for learners

Admin: Monitoring and Reporting

- Up-to-date dashboard of user activity
- Out of box reports available in pdf format:
 - Individual campaign report
 - Report weekly, monthly or at campaign completion
- Campaign Report for Executives
 - Summary of all campaigns
 - Overall completion rate
 - Progress of all campaigns
- A report builder gives admins the power to create custom reports

Welcome! **ABOUT ME**

ALECIA HENDERSON
K-12 ACADEMIC STANDARDS
COMPUTER SCIENCE & EDUCATIONAL
TECHNOLOGY SPECIALIST
ALECIA.HENDERSON@AZED.GOV

What's New with the AZ Educational Technology Standards?!

Standards

Standards: What a student needs to know, understand, and be able to do by the end of each grade.

Standards build across grade levels in a progression of increasing understanding and through a range of cognitive demand levels.

Standards are adopted at the state level by the State Board of Education.

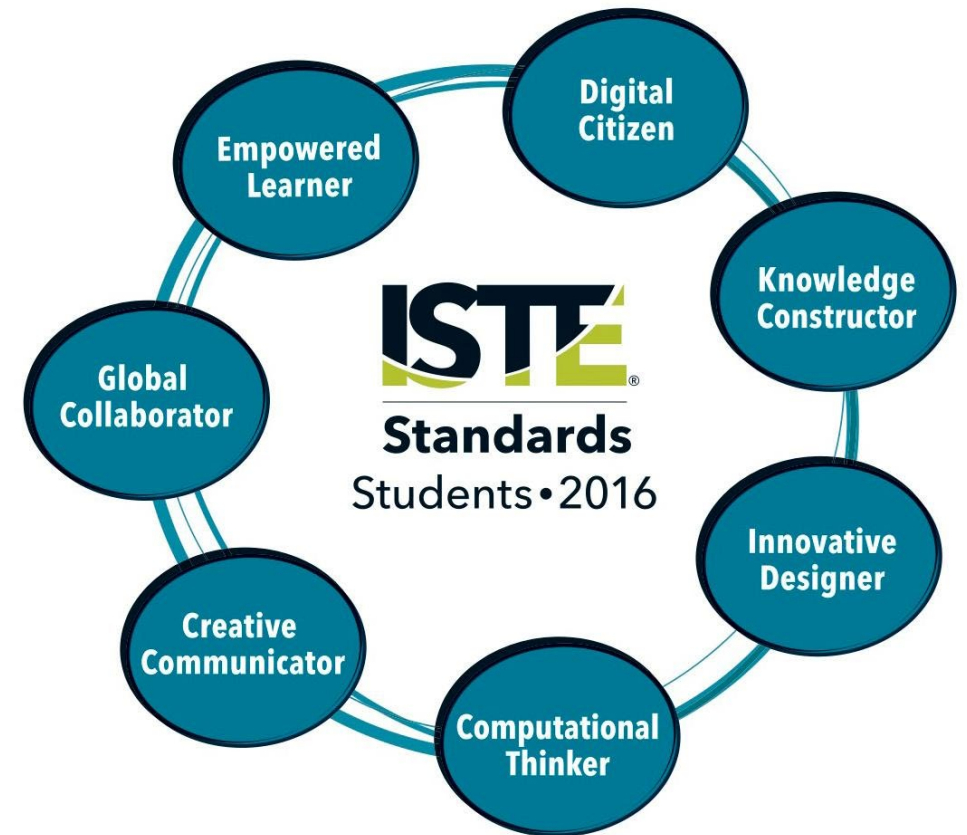

Educational Technology Standards

Foundational Resources:

1. ISTE Standards for Students
2. Washington Educational Technology Standards
3. Wisconsin Educational Technology Standards
4. Wyoming Educational Technology Standards

Structure:

1. K-12 Standard (7 Standards)
2. Grade-band Indicators
3. Grade-band Sample Student Performances
4. Vertical Progression

Standard 5: **COMPUTATIONAL THINKER**

What do you think of when you
hear the words
“Computational Thinker”?

Standard 5: **COMPUTATIONAL THINKER**

Students develop and employ strategies for understanding and solving problems in ways that leverage the power of technological methods to develop and test solutions.

5A

5B

5C

5D

What is computational thinking?

Computer Science	Computational Thinking
<ul style="list-style-type: none">• Focused on understanding how and why computers work, the creation of new technologies, and the impact of these creations on society.• Includes the algorithmic design process in both hardware and software	<ul style="list-style-type: none">• An interdisciplinary problem solving process• Formulating problems in a way that can be understood and solved by both machines & humans• Representing data through models and/or simulations• Involves decomposition, abstraction, pattern recognition, and algorithmic design

Standard 5: Computational Thinker

Standard 5. Computational Thinker - Students develop and employ strategies for understanding and solving problems in ways that leverage the power of technological methods to develop and test solutions.

computational thinking \neq computer science

What is computational thinking?

Element	Description
Element 1: Decomposition	<ul style="list-style-type: none">• Breaking down complex problems into smaller, more manageable parts<ol style="list-style-type: none">1. Start by having students break down a simple task they do all the time (i.e. brushing their teeth)2. Introduce them to more complex problems/scenarios that are unfamiliar and engaging
Element 2: Pattern Recognition	<ul style="list-style-type: none">• Involves mapping similarities and differences or patterns among small problems<ol style="list-style-type: none">1. Introduce by presenting a slide with pictures within a category (i.e. fruits)2. Ask learners to map and explain similarities/differences or patterns• Primary goal: students understand that finding patterns help them to simplify tasks

What is computational thinking?

Element	Description
Element 3: Abstraction	<ul style="list-style-type: none">• Filtering out unimportant details, making the problem easier to understand and solve• Important for students to be introduced to abstraction in relation to patterns<ul style="list-style-type: none">• Helps students to create a general idea of what a problem is and how to solve it by removing irrelevant details and patterns
Element 4: Algorithm Design	<ul style="list-style-type: none">• Determining appropriate steps to take and organizing them into a series of instructions• Includes knowledge from the previous three steps• Keep it simple! Use simple functions such as brushing your teeth to get students started

Computational Thinker Indicators

5.a.

PROBLEM

5.b.

5.c.

5.d.

What does this indicator look like in action?

1. Add up all of the numbers between 1-200 (30 seconds)
2. Let's try breaking the problem into smaller pieces to make it easier to manage: (*decomposition*)
 - a. $200 + 1 = ?$
 - b. $199 + 2 = ?$
 - c. $198 + 3 = ?$
3. What do we notice? (all equal 201) (*pattern recognition*)
4. What is the last pair we will find? ($100 + 101$)
5. How many of these pairs will we have? (100 total)
6. Now, how can we find the total? (100×201)
7. What if we wanted to do this trick with other numbers? (*algorithmic thinking*)

6-8.5.d. Students understand how automation works and apply algorithmic thinking to design and automate solutions.

Additional Resources that Support Computational Thinking

- K-12 Computer Science Framework
- CSTA K-12 Computer Science Standards
- Arizona's K-12 Computer Science Standards
- ISTE Standards for Educators: The Computational Thinking Competencies

Mark your calendars!
*Computer Science
Education Week*
December 5–December 9

What is Computer Science Education Week?

CSEd week is an annual call to action to inspire K-12 students to learn computer science, advocate for equity and celebrate the contributions of students, teachers, and partners to the field.

#CSEverywhere

Celebrate CSEd Week with ADE!

**CELEBRATE
COMPUTER SCIENCE
EDUCATION WEEK
WITH ADE**

How to Host an Hour of Code
No coding experience needed - come join the fun!
Join the movement and introduce your students to computer science with the Hour of Code! In this webinar, participants will learn how to organize an Hour of Code event for their classroom, school, or district by exploring available resources and experiencing lessons for themselves!
Tuesday November 29th
4:30pm-5:30pm

Byte-sized PD - Week of December 5th
Celebrate Computer Science Education Week with a series of 30 minute "Byte-Sized PD"!
Monday December 5th - Dan Schneider - Chapter President of CSTA-AZ
Tuesday December 6th - Mr. Leon Tynes - High School Computer Science Teacher
Wednesday December 7th - Ms. Allison Davis - Kindergarten Teacher
Thursday December 8th - Learning from ADE's CS Team about the Computer Science Endorsement
Time: 4:30pm - 5:00pm
