

Just Move 2 Kids!

In 2023, if every district that serves children with disabilities (106 that have children in a RECP) in Arizona determined that the LRE was a Regular Early Childhood Setting for just two more of their kids,

...and were able to place them into a regular early childhood program,

...and provide the special education services in that program,

....that would improve children's outcomes tremendously! Our data would change from 30.6% to 34.4% in the RECP and reduce the % of children in separate settings from 60.5% to 56.5%
