Discovery Education

The Arizona Department of Education and Discovery Education have a three-year partnership to provide all public and charter schools in AZ with Discovery Education's daily learning platform. This partnership

brings over 200,000 dynamic digital resources and ready to use activities to educators and students at no cost to schools.

Discovery Education provides robust content collections to support conversations around the dynamic process of change and growth. These resources speak to the Collaborative for Academic, Social, and Emotional Learning (CASEL) five competencies and help students learn about the holistic integration of the eight dimensions of wellness. Educators will find content and strategies for teaching about topics related to mental health, life skills, decision making, financial literacy and so much more.

Comprehensive School Wellness Program: Sponsoring a Facilitator Training on Advancing Adult Compassion: A Toolkit for Schools

The Compassion Resilience Toolkit is a flexibly implemented set of individual, small group, and whole staff activities to build compassion resilience in all staff from a system, team, and individual perspective. The content of the CR Toolkit has been strongly informed by research and best practices related to resilience, positive psychology, compassion fatigue, organizational psychology, and mindfulness.
