

Summer 2023 In-Person Math Professional Learning Opportunities

Count Me In: Accessible Algebra Using Tiles

Teachers will walk away with a conceptual understanding of the learning progressions within algebraic reasoning by using algebra tiles. We will explore topics such as integer operations, linear expressions, solving equations, and factoring quadratic expressions. This training is most appropriate for general education teachers and special education teachers in grades 6 through those who teach high school algebra.

[Register for Accessible Algebra: Flagstaff \(June 13, 2023\)](#) or
[Register for Accessible Algebra: Scottsdale \(July 12, 2023\)](#)

Count Me In: Powerful Practices for Inclusive Mathematics Instruction

We will explore various instructional routines that give students the opportunity to engage in multiple means of representation, action, expression, and engagement through the Universal Design for Learning framework. This training is most appropriate for general education teachers and special education teachers in grades kindergarten through high school.

[Register for Powerful Practices for Inclusive Mathematics Instruction: Flagstaff \(June 14, 2023\)](#) or
[Register for Powerful Practices for Inclusive Mathematics Instruction: Scottsdale \(July 13, 2023\)](#)

Count Me In: Foundations for Fluency

We will engage in instructional routines, strategies, and games that help all students to develop the flexibility to solve contextual and mathematical problems involving whole numbers. This training is most appropriate for general education teachers and special education teachers in kindergarten through grade 6 to register.

[Register for Foundations of Fluency: Flagstaff \(June 15, 2023\)](#) or
[Register for Foundations of Fluency: Scottsdale \(July 14, 2023\)](#)

For more detailed information on each training, go to "In-Person Professional Learning Opportunities" at <https://www.azed.gov/specialeducation/math-0>
