³ Table 4 captures the school districts and charter schools that ESA students in all eligibility categories attended immediately prior to enrolling in the ESA program. However, this information is only reported from fiscal year 2017 through fiscal year 2025—Quarter 3. It does not cover the period from fiscal years 2011 (when the ESA program was first implemented) through 2016. In fiscal year 2017, the Arizona Department of Education (ADE) implemented a new student information system (SIS). Because of the risks of relying on student level data from 8 fiscal years earlier that were migrated from another SIS, we chose only to report on data beginning in fiscal year 2017 for the purposes of this report.

⁵ Marketplace is 1 of 4 options that ESA Holders have to spend their students' ESA funds. Currently, the Arizona ESA program is able to capture spending on the ClassWallet Marketplace on an item level. However, ClassWallet does not capture ESA Account Holders' spending on an item level when they spend their funds through "Pay Vendor", seek reimbursements, or use a ClassWallet-issued debit card. When ESA Holders spend their ESA funds through these 3 options, ClassWallet currently only captures data on an order level. For this reason, Marketplace spending, which can be captured on an item level, is separated from the other spending options.

⁶ When ESA Holders purchased items through ClassWallet's "Pay Vendor", used a ClassWallet debit card, or sought reimbursement from their ESAs for items they purchased with their private funds, these items were not captured on an item level by ClassWallet's system, but instead were captured on an order basis. For this reason, Table 10 captures orders and not items. Orders may have included multiple items.

⁷ Items purchased by ESA Holders through ClassWallet "Pay Vendor" platform or for reimbursement from their ESAs were captured by ClassWallet on an order level. When there was more than 1 item on an order, and the items on the order were for different expense categories, the expense categories were not captured on an item level. As a result, we captured these items as "multiple categories".
