

LEA 2.0 is live!

The Teacher Input Application (TIA) has been successfully replaced!

LEAs can officially begin to maintain staff data, manage positions and assignments, monitor compliance-related status, submit performance evaluation data, and access reporting in the LEA2 Portal in the Certification application.

Access the LEA2 Portal by logging in to the Certification application at: <https://cert.azed.gov/>.

Please be sure that your Entity Admin has requested the appropriate role in ADEConnect so that you can begin managing your workforce data! See roles below.

Utilize the "Help" section in the Certification application for user documentation, help videos, and 1-pagers.

Sign up for webinar training sessions at www.azed.gov/teach/lea-2.0.

Thank you for your support during this transition!
