April Math Awareness Month

Dear Educator, February 16, 2026

To celebrate April as Math Awareness Month, AZED, in partnership with First In Math, is hosting the third annual Arizona Zip Code Challenge!

First In Math is a digital site that hosts 250+ engaging math games for all ages. Used by schools worldwide, the platform has already helped participants solve 40 billion math problems.

The challenge runs from April 1st to **April 30th. Anyone can access** the First In Math site at no cost. Log-in is simple:

1. Go to www.firstinmath.com. Use your **zip code** as the user ID.
2. The password for everyone is: **lovemath**

The zip code that has solved the most math problems at the end of the contest wins! All elementary schools within the winning zip code will receive prizes.

There is no obligation to participate. A virtual postcard is attached for sharing on social media and getting the entire community, neighbors, friends, and family to support their local school. Help us discover which zip code in Arizona has the most love for math!

If you have any questions, please contact **Jennifer Kling** at **First In Math** at **jennifer@firstinmath.com**, or **Marisa Tuala** at the **Arizona Department of Education** at **Marisa.Tualla@azed.gov**

Thank you,

Jennifer Kling and Marisa Tuala
