

Enrollment Data

The Arizona Department of Education provides public data on Enrollment Numbers

Option 1

[AZ School Report Cards | Home](#)

Browse Schools

Arizona has 2,431 public schools that are comprised of 1,572 district schools, 572 charter schools and 287 CTED school sites. The selection of a school is an important decision for Arizona families. The report cards found here assist in making those important decisions. Use the schools page to explore more about your school or search for a school that you are interested in.

Find your School

Select the current available School Year

Scroll to the Student Enrollment Graph and Select All

Option 2

[Accountability & Research Data | Arizona Department of Education](#)

Scroll down the screen and expand the Enrollment Section

Enrollment

These reports include the number of students enrolled on the October 1 reporting date. The enrollment counts are available at the following levels: Statewide, County, LEA (school district), and School. These enrollment counts are further broken down for the following demographics: Gender, Ethnicity, EL, Income Eligibility 1 & 2, and Students with Disabilities.

Note: Due to missing data in some variables for student characteristics submitted by schools, the "Total" columns may not match precisely from one tab to another.

2025-2026 School Year

Once here, click on the highlighted link and download the excel sheet. This will provide you with enrollment numbers for all the Schools and LEAs.
