26. How will the LEA ensure Continuity of Services?*

Briefly describe an overview of the continuity of services and in the following questions you will provide more detailed information.

Academy Del Sol ensures that the needs of the school community are met in the areas of academics, social, emotional, and mental health needs including but not limited to tutoring, contact with the Crisis Response Center, and food.

27. How will the LEA ensure continuity of services for students' academic needs?*

The plan is to have all students in-person throughout the entire school year in order to fill gaps created through remote learning. Students will have intervention time planned into their schedules and will be assessed for any gaps they have in their education. During the intervention time, the students will receive instruction in those areas to help catch them up to their grade level peers. We will also have after school tutoring available for students.

28. How will the LEA ensure continuity of services for students' social, emotional, and mental health needs?*

Teachers and staff are aware of the stress students are under. If needed, staff will reach out to the Crisis Response Center for assistance with mental health.

This may include student health and food services.

Academy Del Sol provides free lunch for all students at the Roger campus and ensures all families who qualify for free or reduced lunch receive them at the Star Valley campus. Resources for WIC are available as well.

31. How will the LEA ensure continuity of services for staff's other needs?*

If a staff member reaches out with needs, their needs will be presented to the board and the school will see what can be done to help the staff member.

The LEA must regularly, but no less frequently than every six months (taking into consideration the timing of significant changes to CDC guidance on reopening schools), review and, as appropriate, revise its plan for the safe return to in-person instruction and continuity of services through September 30, 2023

32. Describe the process used to seek public input, and how that input was taken into account in the revision of the plan.*
