

Introducing the NEW 2nd Edition of Arizona's Infant and Toddler Developmental Guidelines

Arizona recently adopted newly revised Infant Toddler Developmental Guidelines. The new guidelines have been the result of two years of collaborative work, led by Program Specialist [Sas Jakeo -Singer](#), amongst early childhood experts and thought partners to ensure Arizona has up-to-date developmental guidelines for our state's youngest learners. Several early childhood partner agencies, districts, and ECE partners worked together to make recommendations and revisions to the guidelines.

Acknowledgments

These guidelines were developed and adapted based upon the Early Childhood Indicators of Progress 2007, Minnesota's Early Learning Guidelines for Birth to Three with permission from the Minnesota Department of Human Services and Department of Health. However, the 2018 version has been updated to include current research and best practice.
